THE WORLD OF BERETTA AN INTERNATIONAL LEGEND

Published to celebrate the 475th Anniversary of the world's oldest gunmaker (and oldest industrial firm) in 2001, "The World of Beretta – An International Legend" is a fascinating 400 pages-plus journey through the unique history and culture of Fabbrica d'Armi Pietro Beretta S.p.A.

World-renowned firearms and engraving expert R.L. Wilson guides us through ten scintillating chapters, fully illustrated with over 380 photographs, plus drawings, paintings and engravings. As well as showcasing the development of the company's innovative firearms throughout the generations, this comprehensive work also provides a rare, intimate glimpse into the proud Beretta family.

Please see page 122 for more information.

ULTRALIGHT

Fit, Feel and Function. The signature of a Beretta Over-and-Under Shotgun

Streamlined ergonomic stock design that ensures comfort and natural feel. A Beretta gun adjusts to you, not the other way around, ensuring perfect eye-hand coordination and fast target acquisition.

The vault-like box lock receiver is constructed with walls twice as thick as other competitors, and is completely enclosed to keep out debris. Machined from solid steel alloy forgings for durability, the receiver's tight tolerance ensures gun does not fall open when loading and reloading.

Top mounted locking lug design allows for a lower profile receiver for perfect barrel alignment with hand and eye, aiding instinctive mount, swing and follow through. This unique Beretta design improves ergonomics, reduces felt recoil and muzzle rise and makes the shotgun a true extension of the shooter. The conical wedge locking lugs are self-adjusting, increasing in tightness of the closure with every round.

Low profile box lock design allows Beretta's 12 gauge over-and-under receiver to be as compact and light as many competitor's 20 gauge receivers.

One-piece, spring-loaded, ejectors have fewer moving parts to ensure simplicity of operation and allow slimmer fore-end design that doesn't interfere with instinctive grip or hand-eye coordination.

Hammer forged steel, chrome lined, ultra-concentric barrels combine effortless balance, strength and resistance to corrosion and residue build-up. Bore and chamber are chrome lined for durability. Barrels can be interchanged, easily and economically, between gauges to maximize versatility. No other manufacturer offers this value.

Minimal and easy maintenance. Though most field guns will never be used enough to require refurbishing, the unique Beretta receiver design, perfected over millions of rounds fired in competitive target shooting, allows for easy and affordable replacement of components susceptible to wear, such as the hinge pins and conical locking lugs. Easy access to all parts is guaranteed for cleaning and replacement.

FIELD GRADE OVER-AND-UNDERS

Onyx Pro Series

NEW

Designed for the American hunter seeking a rugged but attractive over-and-under, the Onyx Pro series features a receiver machined with a distinctive Dura-Jewel design. The stock and fore-end are treated with the new X-Tra Wood finish, a special waterproof process that reproduces the rich grain pattern of Beretta premium grade walnut at an affordable price (see inset on page 7 for more information on X-Tra Wood). The durable diamond-profile cut checkering provides a solid grip, plus greater damage-resistance than traditional,

delicate checkering. The Onyx Pro also boasts our patented Gel-Tek recoil pad, extended Hunting Mobilchoke choke tubes, wide fluted beavertail fore-end and our exclusive Truglo Tru-Bead fiber optic luminous sight. Each Onyx Pro is packaged in a molded carrying case with five chokes and an assortment of accessories. The Onyx Pro 3.5 is the 3 1/2" chambered version and features a non-reflective matte black finish on the barrels and receiver.

ONYX PRO

*Molded Case Includes:*

- 5 Choke Tubes
- Choke Tube Wrench
- Sling Swivels
- Beretta Oil
- Butt Plate or Recoil Pad

What is X-tra Wood?

This wood enhancement finish, exclusively Beretta's, affordably reproduces the rich grain pattern of Beretta's highest quality Premium Grade walnut. The wood core maintains the warmth and feel of wood, while the film and sealant waterproof the entire stock, making it impermeable. The film is protected by a tough scratch-resistant semi-gloss lacquer, while the straight-grained wood core guarantees years of use in all shooting environments.

Available in 2003 on both the Onyx Pro and AL391 Teknys (see page 28), the new X-Tra Wood, is covered by a special refinishing program. Should the consumer damage the finish, Beretta USA will refinish the stock and/or fore-end for a nominal charge. Contact Beretta USA Customer Service for more information. (Program excludes all permanent wood damage or cracking caused by abuse).

Now, for the first time, the hunter can use their "Premium Grade" walnut stock without fear of damaging it!

Every X-Tra Wood stock is clearly but elegantly identified by the distinctive mark on the bottom of the grip cap.

Onyx Series

The modestly priced Onyx and new White Onyx offer the hunter impeccably constructed over-and-under shotguns to withstand years of rigorous field use. Practical, functional but with a distinct touch of class, the Beretta Onyx is noted for the polished black of its barrels and receiver with the signature of P. Beretta in gold.

The new White Onyx features a receiver machined with our distinctive Dura-Jewel pattern and boasts a satin nickel-alloy receiver. Both models come with Schnabel fore-ends and classic two-point diamond cut checkering. Each Onyx is packaged in a molded carrying case with five chokes and an assortment of accessories.

FIELD GRADE OVER-AND-UNDERS

Wing Series

Designed to fulfill everything hunters look for in a shotgun, Beretta Whitewing and Blackwing models are proof that you can still get brilliant results on a reasonable budget. Together they contain all the characteristics of Beretta's renowned over-and-unders: they'll take on the most testing conditions...and the most difficult game.

Practical and functional, the Wing Series is made to measure up to the most intense hunt. Produced in 12 and 20 gauge models, the polished finish receivers display scroll pattern engraving on the Blackwing and game scene engraving on the Whitewing. Further distinction is provided by the slim-line round fore-end of the Whitewing and the classic Schnabel fore-end of the

Blackwing. To minimize sighting glare, the top of the receivers are non-reflective. Gold-plated trigger is standard on all Wing shotguns.

The polished blued barrels feature an open side rib design that not only allows more rapid cooling, but also makes for even lighter handling. The stock and fore-end are designed to optimize pointability and balance.

Built for the most testing conditions and the most challenging game, both Blackwing and Whitewing shotguns contain all the essential features of Beretta's best over-and-unders at a reasonable cost.

FIELD GRADE OVER-AND-UNDERS

Ultralight Series

A full-featured 12-gauge weighing in at less than a typical 20 gauge makes this a dream for hunters on the move. Compare the Beretta Ultralight to other so-called "lightweight" over-and-unders and you'll see that at 5.75 pounds, the Beretta Ultralight has become the worldwide leader in lightweight over-and-unders.

The Ultralight is designed to emphasize durability, safety and reliability based on Beretta's extensive experience in the utilization of lightweight alloys.

Titanium inserts on breechface and shoulders of receiver provide the strength and wear resistance required in these stressed areas. Quail and woodcock game scenes embellish the receiver.

The elegant Ultralight Deluxe features full coverage floral engraving with gold filled flushing game birds. The highly selected oil finished wood and stock oval inlay confirm the shotgun's distinctive appearance.

FIELD GRADE OVER-AND-UNDERS

Pigeon Series

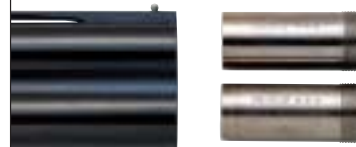

The Beretta Silver Pigeon S over-and-under shotguns are a perfect blend of beauty and performance: the meticulous detail of their appearance mirror their flawless performance in the field. Produced in 12, 20 and 28 gauge models, the Silver Pigeon S over-and-unders are the most elegant, finely balanced and responsive double barrel shotguns in the world...thanks to Beretta's patented locking system which creates a particularly slim yet robust receiver. The receiver is completely closed to keep out dirt and powder residue, reducing wear and maintenance. Beretta's low profile, box-lock receiver is machined from a solid steel forging and features hinge pins positioned as close to the bottom barrel axis as possible.

This arrangement allows barrels to be located lower in the receiver and in closer alignment to the shooter's eyes and hands, so pointability is enhanced. The design results in recoil being more in line with the shooter's shoulders so there is noticeably less muzzle rise when firing and felt recoil is reduced. The durability improves by reducing stress on the locking lugs when firing. All Beretta over-and-unders have replaceable hinge pins. When you take a Silver Pigeon S into the field you equip yourself with the first name in consistent over-and-under performance – the preferred hunting companion of millions.

Pigeon Series - Silver Pigeon IV

NEW

Completely new for 2003, Beretta introduces a shotgun designed exclusively for the US market. Combining classic elegance with innovation. The Silver Pigeon IV is initially notable for the contrast of its beautiful receiver. The deep black finish, with full coverage scroll engraving, is complemented by gold-filled

flushing game birds (on the 12 gauge are mallards and pheasants; 20-28 gauge, quail and grouse). The gold-filled Beretta "three-arrow" logo graces the base of the scroll engraved receiver, while the hand selected oil finished walnut stock is capped by our patented Gel-Tek recoil pad.

Pigeon Series - EELL Diamond Pigeon

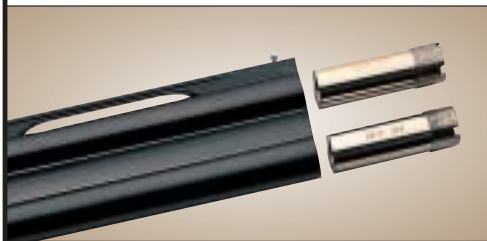

This is the closest thing to owning a one-of-a-kind custom shotgun: a wonderful piece of workmanship with hand-finished hunting scenes and rich scrollwork. Crafted for improved feel, greater target acquisition and superior handling, the Diamond Pigeon is destined to be a classic. The 28 and .410 gauge models are built on a smaller, scaled receiver.

FIELD GRADE SIDE-BY-SIDES

471 Silver Hawk

NEW

The new Beretta 471 Silver Hawk and 470 EL's unite almost 500 years of tradition and elegance with modern innovative technology. Remarkably light and responsive, they incorporate features that enhance performance and durability while preserving their simplicity. Sophisticated laser technology fuses the barrels to the monobloc, creating the unique Beretta Block, while the new 12 gauge Optima-Choke tubes feature an extended constriction taper for minimized pellet deformation and improved shot patterns. The ejection system provides a selector switch inside the fore-end for either automatic ejection or manual extraction. Advanced EDM machining defines the patented locking mechanism.

Featuring a hawk's head inlaid in gold on the top lever, the new 471 Silver Hawk has an elegant, low profile receiver made of a nickel-chromium-molybdenum steel alloy. The top moldings, coined in relief, make these wonderful side-by-sides even more slender and elegant. The special Beretta nickel finish protects the new, rich, floral engraving from scratches and weather conditions. The top lever, triggers, trigger guard, trigger plate and fore-end bushing are also protected by this tough surface finish.

CONSERVATION OVER-AND-UNDER

686 Covey, 686 Ringneck

NEW

As part of its endless commitment to support conservation, Beretta is proud to offer two limited edition shotgun lines: The Quail Unlimited Covey series and the Pheasants Forever Ringneck series. The 686 Covey and 686 Ringneck Limited Editions feature a rich gold-filled flushing game bird engraving on a contrasting gloss black receiver. A maximum of 750 shotguns of each gauge will be made worldwide, with the "1 OF 750" marked in gold, as is the conservation group logo. These are complemented by the gloss-finished select

walnut stock and fore-end. To absorb the more punishing recoil of the 12 gauge, all 686 Ringnecks come standard with our patented Gel-Tek recoil pad. All shotguns are packaged in a molded carrying case with the conservation group logo, five choke tubes and an assortment of accessories.

686 COVEY

CONSERVATION SEMI-AUTOMATIC

27

AL391 Covey, AL391 Ringneck

Demonstrating the continued support of our conservation group friends, the new AL391 Ringneck and AL391 Covey shotguns complement the over-and-under lines. Featuring the same contrasting gold-filled engravings, these shotguns are limited to only 1000 of each gauge worldwide. To ensure collectability, each will be marked with "1 OF 1000".

Both shotguns will sport Beretta's new extended field choke tubes, and the 12 gauge AL391 Ringnecks will also come standard with Optima-Bore overbored barrels and our recoil-absorbing patented Gel-Tek recoil pad. All shotguns are packaged in a molded carrying case with the conservation group logo, five choke tubes and an assortment of accessories.

AL391 RINGNECK

AL391 COVEY

AL391 RINGNECK

Beretta USA is a proud partner to conservation organizations. Therefore, a portion of the profits will be donated back to Quail Unlimited and Pheasants Forever to further their efforts in wildlife habitat restoration.

FIELD GRADE SEMIAUTOMATICS

AL391 Teknys

The height of perfection: after having produced almost two and a half million semi-automatic shotguns, Beretta complements the Urika family with the AL391 Teknys, pushing the boundaries of perfection even further. The new profile of the nickel receiver merges seamlessly with the stock. The polished sides and the anti-glare top and lower profile are a pleasant contrast against the gold plated trigger.

AL391 TEKNYS

The innovative design of the trigger guard permits the elegant blending with the receiver. The trigger guard group in fiberglass-reinforced technopolymer boasts self-lubrication, "improved" feel in cold weather and excellent color retention on a part typically subject to wear and tear. The AL391 Teknys incorporates the latest in technologies to create one of the best field grade semi-automatic shotguns on the market.

AL391 TEKНЫS

AL391 Teknys

New features on the Teknys help separate it from the rest of the competition. The gun features an exclusive Truglo Tru-Bead fiber optic luminous front sight with two interchangeable colored fibers, a patented Gel-Tek recoil pad, and our new X-Tra Wood special waterproof wood enhancement process. X-Tra Wood reproduces the rich grain pattern of the highest quality Beretta premium grade walnut at an affordable price (see inset on page 7 for more information on X-Tra Wood). The stock of the 12 gauge models is designed to fit Beretta's new recoil reducer (sold separately), an 8.5 ounce device adapted from the successful Spring-Mass recoil reduction system on the A391 Xtrema 3.5. The fore-end boasts a modern and practical new checkering pattern to improve

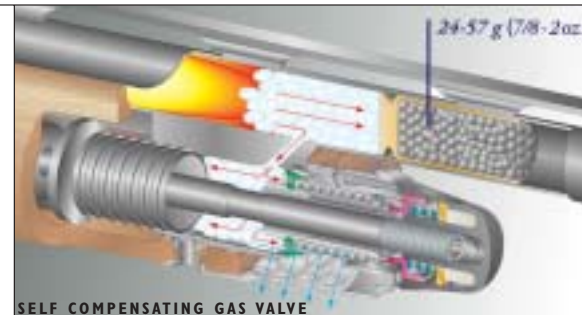

grip and appearance. All 12 gauge Teknys shotguns come standard with Beretta's Optima-Bore overbored barrels and flush Optima-Choke Plus tubes. Incorporating two years of Urika technical advancements, the Teknys comes out of the box ready to cycle all types of shells flawlessly, from the lightest 7/8 ounce to the heaviest 2 ounce magnum loads. The Teknys is presented in a customized, lined, polypropylene gun case containing a complete range of accessories: stock adjustment spacers, magazine reducer, grip cap, sling swivels, five choke tubes, choke tube wrench, valve disassembly tools and a bottle of Beretta Oil.

AL391 Teknys Gold

Destined for the most demanding hunters, who seek top performance together with superior finish and select wood, the AL391 Teknys Gold boasts unique characteristics. The receiver is enriched by deeply engraved hunting scenes and by a seamless fit to the stock with colored enamel inserts. Polished sides, matte anti-glare upper and lower profile, mirror polished gold-plated trigger and a jeweled breech bolt and carrier complete the exclusive features of this

splendid shotgun. The AL391 Teknys Gold is produced in highly selected oil finished walnut. The stock of the 12 gauge models is predisposed to accept Beretta's new recoil reducer (sold separately), an 8.5 ounce device that was adopted from the successful Spring-Mass recoil reduction system found on the A391 Xtrema 3.5.

AL391 Urika

Reliability, versatility, performance. Elegant yet efficient, sleek yet strong, the AL391 Urika's unforgettably graceful lines are the standard by which all other semiauto shotguns are measured. The lightweight, super-strong alloy receiver; lightweight cold hammer-forged barrel (with hard chrome bore); and ergonomically balances stock and fore-end result in exceptional balance, handling and control that is unrivaled in the industry.

This outstanding product is the result of a commitment to craftsmanship and manufacturing excellence that has driven Beretta's endeavors for almost 500 years. It is the perfect hunter's companion. The innovative design of the AL391 Urika gas-compensating valve has taken the operating limits of the gas-operated shotgun to new levels. This "all load" capa-

bility allows for flawless functioning with all types of ammunition, from the weakest 7/8 oz. load to the heaviest 2 oz. With a minimum barrel length of 28" even subsonic load functioning is assured. The unique system vents excess gases to eliminate stress on the operating system and component parts when using heavy loads, extending the life of the shotgun.

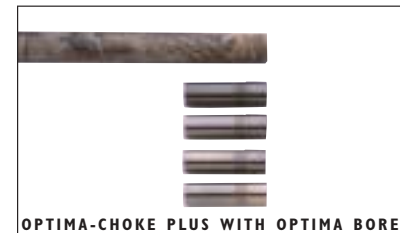

New for 2003, all 12 gauge Urika shotguns come standard with Beretta's Optima-Bore overbored barrels and flush Optima-Choke Plus tubes. The wood stocks of the Urika are predisposed to accept Beretta's new recoil reducer (sold separately), an 8.5 ounce device adapted from the successful Spring-Mass recoil reduction system on the A391 Xtrema 3.5.

XTREMA 3.5**A39I Xtrema 3.5**

When the AL39I Urika was designed the goal was to have the best 3" chambered shotgun on the market. We did not want to penalize the Urika with the added weight, length and cost needed to handle the pressure and stresses associated with the 3 1/2" super magnum loads. The A39I Xtrema 3.5, designed from the ground up to handle 3 1/2" ammunition. Unlike other 3 1/2" shotguns that are simple extensions of their 3" counterparts, the Xtrema is a completely new design that complements and completes the Beretta 39I shotgun family.

The action of the Xtrema features a unique gas operation system. The Xtrema is the first shotgun to incorporate a gas system with a rotating locking bolt. The locking lugs engage the extended barrel tang, that in turn mates perfectly with the receiver due to its indexing lugs and extended surface contact area. This minimizes barrel movement caused by the powerful 3 1/2" loads and improves accuracy. The Xtrema was designed to shoot the heaviest steel loads repeatedly and continuously. The self-cleaning system functions with amazing reliability.

Molded Case Includes:

- 5 Choke Tubes
- Butt Plate or Rubber Recoil Pad
- Sling Swivels
- Beretta Oil
- Choke Tube Wrench

FIELD GRADE SEMIAUTOMATICS

XTREMA 3.5**A391 Xtrema 3.5**

The Xtrema minimizes felt recoil with four design features:

- 1—Gel-Tek recoil pad. The silicone gel core of the Gel-Tek expands and distributes the recoil effect over the entire pad surface.
- 2—Optima-Bore. The overbored barrel, together with the lengthened forcing cone, help reduce the felt recoil.
- 3—Spring-Mass recoil reducer. Located inside the stock, the spring-mass recoil reduction system counteracts the rearward forces generated by shooting.
- 4—Bolt travel recoil absorber. Manufactured from an advanced elastomer, this recoil absorber reduces the stress caused by the bolt impact and simultaneously reduces the vibrations transmitted to the shooter.

Testing has shown that the Xtrema reduces felt recoil up to 23% versus typical semi-automatic shotguns.

The Xtrema features new Optima-Choke Plus tubes. These choke tubes, designed to withstand the stresses of continuous heavy steel shot load use, feature a long gradual constriction to minimize shot deformation and improve shot patterns.

Magazine capacity is three 3 1/2" shells and up to five 2 3/4" shells without the plug reducer installed.

The NEW Xtrema...the softest shooting 3 1/2".

SPECIAL PURPOSE SEMIAUTOMATICS

3901

Derived from the famous AL390 Silver Mallard, the 3901 is a no-frills semi-automatic: an affordable, durable, reliable shotgun. The attractive charcoal gray stock and fore-end balance the rugged all black non-reflective finish on all metal components, while a gold plated trigger accents the assembly. In 2003 this line has been expanded to include the 3901 Camo and 3901 RL (reduced

length) in 20 gauge. The camouflage option includes models in Mossy Oak New Break-Up and Mossy Oak Shadowgrass. The 20 gauge 3901 RL models feature a 13 1/2" length-of-pull stock that is ideal for youths or adults of smaller stature. The provided 1" stock spacer easily adjusts to the standard 14 1/2" length-of-pull.

FIELD GRADE SHOTGUNS

ES 100

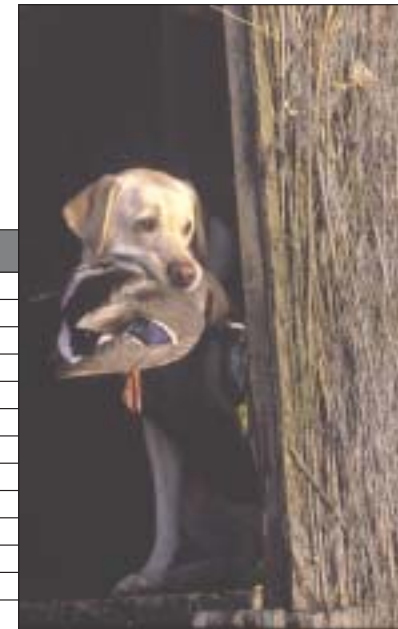

In addition to its reliable, soft-shooting gas systems, Beretta offers the sturdy, mechanically operated ES100. The short recoil, mechanical action delivers the power of a locked breech shotgun, concentrating 100% of the combustion gases behind the shot wad for extra power and range. The lightweight streamlined ES100 design affords instinctive handling, responsiveness and pointability. The black polymer, glass reinforced, checkered stock and fore-end is impervious to weather and abuse. All visible metal parts have an anti-glare, rugged matte black finish. New for 2003, the ES100 Advantage Wetlands camouflage models are complemented by the Realtree Hardwoods HD finish (receiver,

barrel, stock and fore-end). Specially designed for deer hunting, the unique ES100 Rifled Slug is Beretta's only rifled bore shotgun. Chosen for its inherent accuracy, the steel top receiver is permanently attached to a rigid, heavy, 24" barrel with sabot slug-optimized 1 in 28" twist rifling. Since the top receiver and barrel are joined, there is no loss of zero when the gun is disassembled, and heavy recoil will not shift the barrel/receiver/sight system alignment. The receiver is drilled and tapped to accept our accessory scope base (or standard Weaver bases), eliminating awkward "cantilever" scope mounts. Adjustable rifle-style sights come standard with rear blade and bead front.

COMPETITION OVER-AND-UNDERS

682 Gold E

The Beretta 682 Gold E is the most sought after competition over-and-under available. A true competition gun from end to end, the 682 Gold E's Optima-Bore® barrel profile reduces felt recoil and improves shot distribution, while the longer, thinner Optima-Choke® tubes (also available in external version) ensure consistent shot distribution year after year. Ventilated top and side ribs dissipate heat as well as improve pointability and target acquisition.

Available in Trap, Skeet and Sporting configurations, the 682 Gold E is as pleasing to the eye as it is to shoot. The low-profile receiver's dual color finish and modern ellipsis graphic give it a truly unique appearance, and a lifetime of precision shooting is ensured by the self-adjusting dual conical locking lugs, replaceable hinge pins and replaceable barrel shoulders. Triggers on all 682 E's adjust to three positions for length of pull (two trigger shoes supplied).

COMPETITION OVER-AND-UNDERS

687 Silver Pigeon II and El Gold Pigeon II

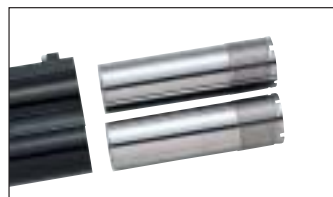

The Silver Pigeon II Sporting Model demonstrate how improved performance and refined beauty can be perfectly matched. Beretta's exceptionally strong, reliable low-profile box lock is enhanced with engraved floral scroll or game scenes. The stock and fore-end are cut from superior quality walnut, selected for grain color and wood density, and built to withstand a lifetime of use and to guarantee perfect balance. The oval plate embedded in the stock is ideal for engraving initials. The barrels are cold hammer forged for concentricity and strength and chrome lined for corrosion and wear resistance. Then they are perfectly polished and have a deep blued finish.

The ventilated competition rib is available with either a white target or fluorescent front sight.

Offering the features of the 687 Silver Pigeon II hunting model, this sporting clays over-and-under is enhanced by beautiful game scene deep relief engraving on the receiver. The stock and Schnabel fore-end are constructed of a high-grade, select walnut. Single selective trigger is gold. New for 2003, the Silver Pigeon II Sporting 12 gauge models come standard with Optima-Bore and extended Optima-Chokes.

COMPETITION OVER-AND-UNDERS

686 E

The new range of 686 E has been revamped and re-designed to make them the most sought after competition over-and-unders available. The receiver of the 686 E boasts the same exclusive dual color finish as the 682 Gold E. Together with the modern ellipsis graphic motif, the contrast between the

glossy, matte and gold parts ensures an extraordinary beauty. Beretta's electroless nickel finish provides added protection against the elements. The 686 E Sporting comes with single selective trigger, special Sporting Stock and Schnabel fore-end and white front sight with mid-rib bead.

AL391 Teknys Gold Sporting

Beretta has taken the famous AL391 Urika shotgun design and improved upon it to make the ultimate clays gun: The AL391 Teknys Gold Sporting. The Teknys Gold is distinguished by the deep relief stylized Beretta logo on the receiver, the distinctive blue enamel inlays, the elegant satin nickel finish and the highly selected oil finished walnut. The fore-end boasts a modern and practical new checkering pattern to improve grip and looks. An interchangeable rib system allows the user to swiftly change rib configurations, from flat to stepped and

AL391 TEKNYS

from tapered to parallel. Although the standard configuration is a flat tapered steel rib, future options will be made available and include lightweight aluminum versions. Different height, widths and materials will allow the user to customize the sight plane, point-of-impact, weight and balance of this unique firearm. The gun also features an exclusive Truglo Tru-Bead fiber optic luminous front sight with two interchangeable colored fibers and a patented Gel-Tek recoil pad.

The stock of the 12 gauge versions accepts Beretta's new recoil reducer (included), an 8.5 ounce device inherited from the successful Spring-Mass recoil reduction system on the A391 Xtrema 3.5. All 12 gauge Teknys Gold shotguns come standard with Beretta's Optima-Bore overbored barrels and extended Optima-Choke tubes (20 gauge models come standard with extended "Victory" Mobilchoke tubes). The 12 gauge Teknys also comes standard with a newly designed Fast Bolt Release.

COMPETITION SEMIAUTOMATICS

AL391 Teknys Gold Sporting

Incorporating two years of Urika technical advancements, the Teknys comes out of the box ready to cycle all types of shells flawlessly.

The Teknys Gold is presented in a customized, lined, polypropylene gun case containing a complete range of accessories: Stock adjustment spacers, thin rubber recoil pad, five choke tubes, choke tube wrench, valve disassembly tools and a bottle of Beretta Oil.

COMPETITION SEMIAUTOMATICS

AL391 Urika

They're the genuine article: the AL391 Urika semiautomatic trap, sporting clays and target shotguns have the inherent design, control and reliability of the AL391 hunting models, but also possess features that mark them as true competition shotguns.

It's one of the softest shooting autoloaders, right out of the box, thanks to the self-compensating gas system, while the stocks, fore-ends and buttplates are designed for maximum performance in every shooting discipline. New for 2003, all AL391 Urika Competition 12 gauge shotguns feature Optima-Bore and flush Optima-Choke Tubes.

National Proof House Year Stamp Markings

The "Banco Nazionale di Prova" (National Proof House) stamps all Italian manufactured firearms after proofing. The year stamp noted designates the year of proof. In the case of new firearms the proof year corresponds to the year of manufacture.

Italian manufactured firearms only. The markings are most commonly found on the receiver/frame and on the barrel.

YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK

Sako & Tikka Rifles

For over eighty years, Sako Ltd. of Finland has impressed the world with the quality of their bolt-action rifles. And the excellence of their product also impressed us at Beretta – to the point that, in 2000, we decided to become the sole importer of Sako and Tikka rifles in the United States. Sako Ltd. shares our passion for quality and our commitment to offering shooters the best that technology can offer. Without compromise.

Both brands produced by Sako Ltd. (Sako and Tikka) are truly the finest production rifles available to the American shooter. Their match-grade barrel, adjustable trigger, silky-smooth bolt and distinctive styling are only a few of the attributes that have made Sako and Tikka household names in the USA. Most importantly, these rifles leave the Finland factory only after passing a rigorous 1-inch, 100-yard test, making them an industry benchmark for out-of-the-box accuracy.

SAKO BOLT-ACTION RIFLES

Sako 75 Hunter and Hunter Left-Hand

Combining attractive appearance with superior accuracy, reliability and performance, the durable Sako 75 Hunter is renowned as a rifle that gets the job done, time and time again. Designed by master Finnish gunmakers, the Sako 75 Hunter features a high-grade walnut stock and a deep blue metal finish.

New for 2003 is the Sako 75 Hunter Left-hand, is a mirror image of our popular 75 Hunter and is available in a selection of America's favorite calibers. Both models are equipped with a detachable staggered magazine.

The Sako KEY CONCEPT® is a revolutionary step forward in gun safety – the first integral rifle lock in the world. Our invention is astonishingly simple: insert, turn and remove the key. The firing pin is now blocked. When locked, your Sako rifle cannot be used by anyone else. Insert the key, unlock and instantly the rifle is fully operational.

Thanks to the KEY CONCEPT®, your Sako is safe at home, in the car, at the range, during breaks and while in the woods.

The KEY CONCEPT® has been thoroughly tested with various loads and in all weather conditions. And of course we would never dream of compromising our legendary accuracy. Sako is still the world's most accurate rifle out-of-the box. Now it is also the safest.

The KEY CONCEPT® is available on actions III, IV & V.

Sako 75 Stainless Synthetic & 75 Finnlight

The Sako 75 Stainless Synthetic and Finnlight models are truly unique performers, featuring all-stainless barrel, action and internal parts: this makes them first among equals in the demanding tough-weather rifle market.

An American favorite winning converts worldwide, the Sako 75 Stainless Synthetic is a high-performance rifle built to be used hard in extreme conditions, with soft rubber over-molding for a firm hold and warm feel even in cold weather.

A lightweight rifle with no compromises on accuracy, balance or safety, the Sako 75 Finnlight is designed for long hunts on difficult terrain, offering uncompromising strength and reliability in a compact and particularly attractive package. New for 2003, the Finnlight now comes in the popular 300 WSM caliber.

RIFLES

Sako Safari 80th Anniversary Model and Sako 75 Custom Deluxe

This exclusive, limited-edition rifle is a true masterpiece in its class. The Sako Safari 80th Anniversary possesses the best blend of traditional looks, state-of-the-art performance and futuristic technology. Production is limited to 80 rifles worldwide; serial numbers 200101-200180. This exquisite rifle, chambered for the classic .375 H&H cartridge, is built around a Sako 75 magnum long action V, to which we have added an extra-reliable controlled-feeding claw.

Take a hyper-accurate Sako 75 barreled action with a rich, truly gorgeous deep blue finish. Add a carefully hand-selected premium-grade walnut blank and an exceptionally-skilled Sako Custom-shop artisan. These are the primary ingredients of the Sako Custom Deluxe, a rifle that will seduce even the most demanding among firearm owners and collectors.

SAKO BOLT-ACTION RIFLES

Sako 75 Varmint and Varmint SS Laminated

This long-range rifle is built for pinpoint accuracy in both varmint hunting and target shooting, and offers two action sizes for a perfect cartridge/action match. A heavy, totally free-floating barrel affords unmatched accuracy, while minimizing vibration and recoil.

The top-grade walnut stock and extra-wide flat bottom beavertail fore-end assure accuracy and comfort. As with all Sako rifles, they are equipped with a crisp, positive adjustable trigger for precise and creep-free release.

TIKKA BOLT-ACTION RIFLES

Tikka T3

How can we utilize the latest technologies to make our world-class product affordable to the majority of hunters? This was the question we posed ourselves when we engineered the revolutionary Tikka T3 and we are extremely proud of the answer we came up with. The new Tikka T3 offers all the features and benefits of our popular Whitetail series, plus a new sexy look and a truly unbeatable price tag. The heart of the T3 is our hyper-accurate

cold-hammerforged barrel, sturdily anchored to a silky-smooth action. The trigger is crisp and positive, and is easily adjustable for weight of pull (2-4lbs). This barreled action is designed to give you unbeatable out-of-the-box accuracy, the same accuracy for which Tikka rifles are gaining such a dedicated following here in the USA.

Among the many revolutionary features of the Tikka T3 line, one of the most noticeable is the light weight and fast handling of the Lite models. One of the lightest production rifles on the market, the Tikka T3 Lite is designed to combine low weight with our trademark sub-minute-of-angle accuracy. This model feels, looks and shoots like a custom-shop rifle, but only costs a tiny fraction in comparison. That's what we call good use of technology.

The body of the T3 is the work of famed Italian designer Giugiaro. True to their excellent reputation, Giugiaro styled the T3 stock to perfectly blend innovative looks and traditional lines. The result is a gorgeous yet highly ergonomic stock that will please young and seasoned shooters alike. We are also proud to introduce the popular 270WSM and 300WSM to the lineup of Tikka chamberings.

TIKKA BOLT-ACTION RIFLES

Tikka Whitetail Hunter Series, Stainless Synthetic, Stainless Laminated, and Deluxe

The Tikka Whitetail Stainless Synthetic and Stainless Laminated combine all the winning features of the popular Whitetail line with a tough, durable non-reflective stainless steel finish. The Stainless Synthetic model sports a rugged synthetic stock, while the new Stainless Laminated is offered in a checkered laminated-stock configuration that is equally weatherproof and elegant.

The Tikka Whitetail Hunter Deluxe is truly one of the most attractive rifles in our lineup, featuring a deep gloss finish, a fore-end tip grip cap and a roll-over cheekpiece. But don't let its beauty fool you: in the field, this model is just as tough, reliable, accurate and ergonomic as all our other offerings.

RIFLES

Tikka Hunter Series

Available by popular demand! All the exciting features and performance of Tikka by Sako can now be fully enjoyed by left-handed shooters. The Tikka

Whitetail Hunter Left Hand is a mirror-image of our popular Whitetail Hunter and is available in a wide selection of America's favorite calibers.

TIKKA WHITETAIL HUNTER LEFT HAND

Every Tikka rifle must fire a 1", 3-shot group, at 100 yards prior to leaving the factory.

TIKKA BOLT-ACTION RIFLES

Tikka Continental Varmint and Long Range Hunter

The Tikka Continental is designed to be a real tack-driver right out of the box. It is equipped with a varmint-style heavy barrel that will ensure top-notch performance shot after shot in the most demanding conditions. The Continental features a varmint stock with beavertail fore-end, and is a favorite among varmint hunters and benchrest shooters alike.

Tikka Target

It is accurate to say that the Tikka Target has a reputation next to legendary. The versatile Target is a perfect rifle for those looking for uncompromised accuracy both in competition and hunting. The adjustment possibilities will match each shooter's individual style, build and posture: cheekpiece and

buttplate are fully adjustable and the buttplate is adjustable for distance, angle, height and pitch. If you are looking for match-grade accuracy at a competitive price, the Tikka Target is your choice.

Beretta Pistols

In the handguns stakes, Beretta wins - hands down. The automatic choice of marksmen, sportsmen, law enforcement and the military worldwide, Beretta pistols carry with them their own cachet and reputation.

Deservedly so: a Beretta pistol is both a triumph of design and reliable performance, offering the user the optimal combination of form and function. The gun that protects America.

PISTOLS & HOME PROTECTION

Stampede SAA Revolver

We are proud to introduce the new Beretta Stampede single action revolver. The Stampede meticulously replicates the dimensions, cosmetics and feel of the legendary Old West sidearm, while discretely incorporating the most modern safety features and manufacturing materials for which Beretta is rightfully famous. We have carefully researched the dimensions of this revolver to closely match the 19th-Century originals.

Also, the feel and functioning is like the originals, with a multiple-click single-action hammer mechanism and a half-cock position that allows the cylinder to spin free. But unlike the originals, the Stampede features an innovative transfer-bar safety, making it possible to safely load all six chambers, and is constructed of modern, durable steels. We designed the Stampede to give you years of safe, trouble-free enjoyment – whether it be at the range, in the field or on the competitive Cowboy-action circuit.

Stampede SAA Revolver

Chambered for the classic, .45LC, .44-40 and .357 Magnum cartridges, the Stampede is available in the original barrel lengths 4 3/4", 5 1/2" and 7 1/2". Choose between the rugged and traditional blue finish, the fancy Nickel version or the elegant Deluxe model with charcoal blue and high-grade

walnut grips. The frames of both the blue and Deluxe models feature the new Beretta Color-Case finish – our durable and particularly attractive interpretation of the traditional color-case look.

U22 neos

U22 Neos

The latest addition to the Beretta stable of handguns, this light, modern, perfectly weighted pistol is ideal for beginners. But its sophisticated design and powerful accuracy make it much more than a mere "training gun".

As an introduction to or an extension of the Beretta handgun range, Neos reflects a sleeker look and feel, guaranteed to appeal to a new generation of Beretta enthusiasts.

U22 Neos, from the greek word for "new", the Neos represents a starting point for a complete line of pistols. Safety, accuracy, modular construction, easy maintenance, modern styling and innovation were all goals for Beretta's first 100% American designed and manufactured pistol. All these goals were accomplished, together with an affordable price!

U22 neos

The Neos is the ideal gun for entry-level pistol shooters, but its modular design allows it to be adapted to the advanced shooter's needs.

The pistol features interchangeable barrel and grip units. Three different barrel lengths (4 1/2", 6" and 7 1/2") will be offered. All barrels feature an integral rail that accepts standard Weaver® style scope mounts, and each one includes a fully adjustable target rear sight. Since the sight system is

mounted on the barrel unit, you don't lose zero when the barrel is changed. The pistol is easily disassembled into its five basic subassemblies without special tools. Maintenance, cleaning and inspection is quick and simple.

The Neos features an ambidextrous safety lever with tactile indicators when safety is "on", a chamber plug and cocked firing pin indicator. A locking mechanism is also provided.

92/96 Series

The ultimate pistols: not an official title, but one which perfectly describes the legendary Beretta 92 & 96 Series. Selected by a multi-national roster of defense and law enforcement organizations (including the U.S. military), these pistols are proven both in the factory and – more importantly – in the field.

Rugged, reliable and, above all, safe, these are special handguns for special tasks – tested and retested for quality control, high performance and reliability to meet the exacting requirements of its users.

92/96 Series

Beretta Vertec. Take the world's most tested and trusted pistol, the Beretta 92/96 series. Add new capabilities in response to the demanding needs of our law enforcement and military customers without compromising the quality, reliability, and safety for which the Beretta pistol is already famous. The result is the revolutionary new Beretta Vertec.

The new vertical grip design, combined with a special short reach trigger and thin, innovative dual-textured grip panels, guarantee a sure grip and maximum

controllability during rapid fire, even for small-handed shooters. An integral accessory rail is built into the frame to attach a variety of popular white light and laser devices. The front sight is removable for the easy installation of tritium or other specialty sights. The magazine well has been aggressively beveled for faster, more positive reloads.

The Beretta Vertec...the next step in a long tradition of pistol excellence.

92/96 Series

The newest addition to Beretta's legendary Elite series pistols. Developed to meet the "Special Duty" requirements of elite law enforcement and military units, this advanced pistol is also ideal for IDPA competition shooting. The "G" decock-only mechanism guarantees that the pistol is always ready to fire, eliminating the possibility that the safety is accidentally left engaged during stressful competitive shooting events. The "SD" features an integral accessory rail machined into the frame to attach a variety of popular white light and

laser devices, a Brigadier style recoil-reducing heavy slide, and removable front and rear Trijicon 3-dot tritium sights. The frame is customized to include front and back strap checkering and an aggressively beveled magazine well for faster reloading. The stainless barrel, finished in our proprietary Brunton finish, boasts a machined target crown. The extended magazine button allows for quick magazine drops.

92/96 Series

The Elite II was developed for the advanced competition shooter. The heavy Brigadier slide helps reduce felt recoil and muzzle rise and features forward slide serrations and a low profile Novak rear sight with thin serrated front sight. The skeletonized hammer adds a distinctive look and reduces lock time. An aggressively beveled magazine well and flush hammer spring cap speed up reloading time, while the extended magazine button facilitates rapid magazine release. The stainless slide and barrel improve corrosion resistance. The short and flush barrel features a target crown. The front and backstrap of the frame

are checkered for a positive grip, while the magazines are protected by extended rubber bumpers. The improved trigger pull and the "G" decock-only lever complete this competition package. The Elite IA is a hybrid between the Elite II and the Vertec pistols. It features the Vertec's thin textured grip panels, vertical grip design and integral accessory rail. From the Elite II it adopts the Brigadier slide, forward slide serrations, skeletonized hammer, rubber magazine bumpers, flush hammer spring cap, beveled magazine well, flush stainless barrel (with black Brunton finish), and decock-only lever.

92/96 Series

The ultimate pistol, the ultimate Beretta: the Billennium 92 Limited Edition. This stunning semiautomatic pistol offers a new level of performance with the benefits of a steel frame and carbon fiber grips, crisp single action trigger pull, frame-mounted safety and micro-adjustable and interchangeable sights. With a unique finish and engraving, this pistol is destined to be regarded as another Beretta classic by your customers. Only 2,000 will be made worldwide.

92 BILLENNIO

To celebrate the 470th anniversary of the world's oldest gun maker, Beretta USA proudly offers this limited edition pistol for the most discriminating collector. Only 470 pistols will be sold worldwide. Unique features include a mirror polished finish, stainless steel construction, and figured select walnut grips with inlaid gold plated medallions. Special and unique gold-filled engraving includes the signature of Beretta's President, cav. Ugo Gussalli-Beretta. The 470th Anniversary logo is engraved on the top of the slide and the back of the magazine. Each pistol is identified by a "1 of 470" (through "470 of 470") gold filled individual number. Special chrome plated magazine is included. Deluxe lockable walnut display case with distinctive teak inlays and 470th Anniversary engraving.

92 '470TH'

8000 Cougar

The Beretta Cougar 8000 Series semi-auto has developed a formidable reputation as a reliable, potent pistol. Originally designed as an undercover handgun, the Cougar's superior design, low recoil and accuracy have made it a growing favorite of uniformed police officers.

Ergonomically advanced, with a user-friendly, contoured frame, the Cougar is exceptionally easy to control during firing, with rounded edges to preclude snagging during the draw. New for 2003, the new 8000L features the same rotating barrel system of the full-size Cougar, but the grip has been shortened and redesigned to be in proportion with the restricted capacity 10-round double-stack magazine.

9000S

Lightweight, high impact: that's the winning blend characterized by the Beretta 9000S pistol. These remarkably compact guns are distinguished by their comfortable practicality – and their potent calibers.

Styling by Giugiaro Design brings a modern look, while the soft polymer inlay ensures a firm grip in all conditions, and also absorbs vibrations.

Cheetah

Delivering .380 power in a personal-size package, the Cheetah medium-frame pistols further extend the Beretta handgun standards of reliability, safety and performance.

The semiautomatic Cheetah comes in an array of models to match your shooting needs, each with an open slide design to eliminate jams and stovepiping – making it a natural for personal defense and a back-up gun for law enforcement.

87 Target

The 87 Target is a .22LR single-action pistol designed for practical shooting and training. The 6" (150mm) long barrel is covered by a lightweight alloy sleeve that accepts optical sighting systems (Weaver interface). The sights are adjustable, and the magazine features a sturdy rubber pad. Standard grips are

plastic, however walnut grips are available on request. Trigger pull is very light and crisp. The pistol is designed to remain upright when set down on a flat surface, ready to be quickly gripped, magazine loaded and raised to the target (.22LR Practical Shooting).

Tomcat and Bobcat

Beretta small caliber, pocket-size pistols embody the same dedication to design and uncompromising quality control as our 92/96, Cheetah and Cougar models.

Tomcat and Bobcat models are all distinguished by their practicality, simplicity and safety, with tip-up barrels allowing direct chamber loading and an anti-jam openslide design.

HOME PROTECTION

Cx4 Storm

The Storm is coming... Designed to meet the needs of law enforcement, the new CX4 Storm is also excellent for sport and home defense. The Carbine accepts standard full size Beretta pistol magazines, perfectly complementing the famous 92, 96, 8000, 8040 and 8045 series of Beretta pistols. The fixed barrel design and long sight radius (12.9") make this gun inherently accurate. The cold hammer forged 16.6" barrel is chrome lined for maximum corrosion resistance and increased barrel life. The 53/4lb. weight and overall length of 29.7" make this Carbine light and compact. Semiautomatic blowback design is simple, rugged and reliable. Field stripping can be done simply and quickly without any tools.

CX4 Storm

High strength technopolymers were used to reduce the weight, increase corrosion resistance, eliminate problems associated with metal finish wear, and achieve an affordable price. Cross-bolt safety, magazine button and bolt-handle are easily reversible for right or left-hand use. Even the ejection can be switched from right to left and back without the need of tools or additional components. Firing pin and hammer block prevents movement of these critical components until the trigger is pulled, and a bolt safety will not allow the bolt to cycle should the carbine be dropped or struck against an object.

Available second quarter 2003

Cx4 Storm

HOME PROTECTION

Cx4 Storm

Once again, Beretta teamed with internationally renowned Giugiaro Design to study the ergonomics and style the firearm. Rounded forms are snag-free, modern and innovative. Rubber stock comb provides a comfortable rest for the cheek. Magazine is inside the grip, protected from impact and the environment. Controls are very similar to those found on our popular 92FS pistols, so most shooters will be immediately familiar with the operation of this firearm. Length of pull can be lengthened in .6" increments, from 13 1/4" to 15" by adding one to three stock spacers (one provided). Multiple sling

attachment points allow a multitude of carry options. Retractable forward accessory rail extends out from the fore-end, allowing quick mounting of tactical light or laser unit. Hard mounting points allow the addition of various accessories, including side, top and bottom "Picatinny" rails. These will accept optics, tactical lights, lasers and vertical grips. One side rail included. Front post sight is adjustable for windage and elevation, while the rear ghost ring sight has long and short-range apertures. Both sights are protected by rugged "ears" and may be folded down when optics are used.

CO₂ PISTOLS

92 FS/CO₂ Series

Constructed under Beretta license by Germany's UMAREX, the 92 FS/CO₂ pistols are faithful replicas of the famous ordinance utilized and trusted by armed forces, troops and police worldwide. Operated by a CO₂ capsule lodged within the grip (capable of more than 60 shots), the pistols come supplied with 2 magazine cartridges containing 8 shots of 4.5mm (.177")

caliber pellets. The two models, Standard and Match, are both available in a polished black or nickel-plated finish with either plastic or wood grips. Thanks to the weight (close to that of the 92FS pistol) and the limited noise factor, the 92 FS/CO₂ pistols are ideal for training in enclosed environments and at a very reasonable price.

C81478	80594-8	9000S Extendable Magazine Bottom	All Calibers	-	\$10.00

* Mini Cougar magazine spacers may be mounted on full size Cougar magazines (JM8000/JM8040/JM8045). The spacer will fill the gap between the frame and the magazine bottom when a full size Cougar magazine is used on a Mini Cougar pistol.

** Some fitting may be required when using this magazine adapter on Beretta Model 9000S pistols with serial no. below SZ000900 (9mm) or SN006500 (40 S&W). The engagement tab may require some light filing or sanding to allow the magazine to drop free when the magazine release button is depressed.

9000S Series Magazine Adapter (allows to use 92/96 "pre-ban" magazines, and extends the 9000S grip into a "full-size" configuration). Extendable Magazine Bottom (extends 1 1/32" when pistol is drawn for better grip, retracts when holstered for concealability) - See page 101 for details

Choke Tubes

The Mobilchoke, Optima-choke and Optima Plus systems have advanced choke tubes to the strictest standards. With our commitment to innovation, it's fitting that Beretta employs them in our choke tubes. Additionally, we have an extensive selection for 12, 20, 28 and .410 gauge for hunting or target shooting. Our choke tubes are built to perfectly fit and perform with Beretta shotguns.

RIFLE PRO SHOP

Sako and Tikka Optilock™ Scope Mount Bases and Rings

Optilock™ scope mount bases and rings are specifically designed to fit the integral dovetail rails on Sako and Tikka rifles. The rings' patented polymer sleeve ensures a firm yet scratch-free grip on the scope, as well as trouble-free alignment. The rings and bases are constructed of durable, solid steel.

Choose a base to fit your rifle action and rings to match your scope and desired height (see drawing and chart). All Optilock™ bases and rings come in clampacks, complete with hex key and assembly instructions. We also offer ring mounts and "Quickmount" quick-detachable sets.

The Beretta Advantage

Breadth of Product Offering:

- Tactical, Field, Hunting, Pocket models and Collector Editions.

Blade Steel and design chosen for best performance for intended end use:

- Hollow-ground design on Model 92 facilitates smooth cutting.
- Full tapered tang on Loveless Quince for better balance.
- AUS 6 and 8 steel combination to hold an edge and ease sharpening.

Handle/scale materials chosen for both utility and beauty:

- Zytel Loveless for ultimate utility.
- Figured Quince for presentation quality.
- G-10 and aluminum for durability and lightweight.

Meticulous fit and finish:

- Carbon overlay on Avenger II blade.
- Figured Quince on Loveless Hunter and Skinner.

Multiple locking designs:

- Positive liner lock on model 92 and Airlight II for one-hand operation
- Dependable back lock on original Airlights and Busfield for slim design

Form follows function:

- Ultralightweight materials and skinner blade designs.
- Durable solid aluminum scales on Airlight.
- Light strong carbon graphite scales on Avenger II.

Special and Limited Editions for Collectors:

- New "United We Stand" Airlight Special Edition.
- New M9 "America's Defender" Limited Edition.
- New Loveless Hunter Whitetail Limited Edition.

COLLECTOR KNIVES

M9 America's Defender and "United We Stand" Airlight

It is one of the most famous handguns in history. The Beretta M-9 has been at the side of service men and women for over 15 years. What better way to pay tribute to the men and women who carried it proudly than to make a knife with the same proud look and feel.

The M9 is a limited edition 1 of 1000. The solid black tanto blade and pistol grip handle are elegantly displayed in an oak box with glass top. The Bruinton finished blade marked with the M9 markings is made of AUS 8 steel and the liner lock system is solid black. The collection is finished off with an American flag pin.

Model 92 and Avenger II

The Model 92 knife utilizes the styling of one of the most famous handguns in the World, the Beretta Model 92. It not only looks like a 92, it performs like the famous firearm.

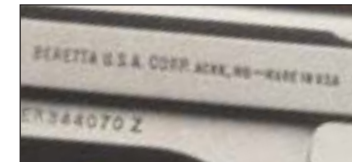

One-hand operation, AUS 8 steel, liner lock. Blade is stamped with the same markings as an actual 92.

The Avenger's sleek black carbon fiber handles provide the ultimate in lightweight and strength. Combine the same strong lightweight-carbon fiber with VG-10 steel to form the Tanto-style blade and you have a matchless lightweight folding tactical knife. Front full length liner lock and ambidextrous thumb stud provide quick one-handed opening and closing. The perfect marriage of high-tech materials and unique design.

Airlight II

For over 10 years the Airlight has been the center of Beretta blades. Its versatility as a tactical carry or a field blade has made it the most popular Beretta knife ever made. The legacy will go forward with the announcement of the Airlight II. This new generation of Airlight knives has the same slim

lightweight feel. It boasts AUS 6 steel and solid aluminum scales. The liner lock system allows for one-hand operation. Beretta's new Sure Grip™ finish gives a confident grip for defense. Both sizes include a belt clip.

HUNTING KNIVES

Loveless Fixed Blades

R.W. Loveless is one of the premier knife makers of our time. His designs are famous for their beauty and functionality. To get a custom Loveless knife collectors wait up to a year and spend as much as \$1,000. Beretta was one of the first to team up with R.W. Loveless to create the first production

Loveless knives ever made. Now, every hunter can enjoy a Loveless design. His hollow-ground blades are not only beautiful but they maintain a razor sharp edge for field dressing and skinning. The Beretta Loveless Collection is available in Zytel or Figured Quince handles.

Fieldlight™ and Stag Folders

The Beretta Fieldlights™ are lightweight, slim and made for use in the field. AUS 8 steel with durable Zytel handle. Each knife comes with its own Ballistik Nylon sheath with belt loop, however the slim lightweight design is perfect for carrying in your pocket. Beretta Fieldlights are a lot of tools for the field packed into a small package. The Stag folders are like carrying a hunting tool kit in your pocket. Exceptionally rugged, these knives come with two or three blades

ready to cover every-in-the-field contingency with ease. Each feature silvered bolsters, golden Beretta Trident logo embedded inside of the handle and lanyard hole. Beautiful Stag Scales. The Stag Multi-use two-blade knife has a heavy-duty main blade and rugged bird hook. The three blade has a main blade, gutting tool and a bone saw. All are made with 440C Steel.

Beretta Clothing

Beretta brings its legendary durability and attention to detail to each of its five clothing lines.

The Upland Series is specially developed for both men and women who birdhunt. Designed for freedom of movement using weathered cotton canvas and Dupont Cordura fabrics for maximum abrasion resistance.

The Waterfowl Collection features Beretta's unique Agility Ergonomic design and employs laminated, waterproof, breathable fabrics to keep hunters dry, comfortable and mobile in multi-climate environments.

The Big Game Series also employs the Agility Ergonomic System with a base fleece fabric and total concealment patterns for cutting-edge, yet lightweight protection in any weather.

Beretta applies cutting edge technologies to clothing and accessories for both the male and female target shooter. From shooting shirts to gloves and jackets to vests, Beretta offers an extensive range of speciality shooting products to compliment any shooters needs.

The Pride Series offers the Beretta enthusiasts a range of impeccably made streetwear.

Beretta is proud to offer a full range of Premium Grade products at select dealers throughout the USA and the Beretta Galleries.

GIUBILEO/12

Masterpieces of the Gunmaker's Art

Exhaustive attention to detail has always been our fort . Nowhere is this better illustrated than in our Premium Grade firearms, where master gunsmiths, barrel makers and engravers are given total freedom in personalizing these masterpieces, the culmination of five centuries of superior craftsmanship.

The Barrel Construction

Indebted to the heritage of Bartolomeo Beretta, who by 1526 perfected the barrel making criteria inherited by succeeding generations, construction begins with the choice of material. Research and experimentation has confirmed that Boehler Antinit steel is the optimum option for barrel gunmetal, combining flexibility, corrosion resistance, high tensile and impact strength.

Beretta makes barrels distinctive both inside and out. Within, the design allows simple installation of a standard universal or

Magnum chamber, fixed-choke or a Mobilchoke housing. Cold-hammer forging forms the tubes over the mandrel from gun drill to blanks, internally honed. The external profile is then turned, ground, polished and preset for precision tube assembly and rib mounting. A final polish of the tubes for perfect ballistic performance precedes an oxidation-surface cleaning to create the resilient, recognizable black finish.

Receiver & Mechanisms

Action is everything: it impacts speed and precision in firing, while its locking system determines durability and performance down the generations. This crucial component begins as a solid block of Nickel-Chromium-Molibdenum alloy, precision computer machine-tooled into shape, and

then crafted by the hands of the master gunsmith, who hones the lugs and bolts, smaller lugs and hinge pins into a perfect fit with file and emery cloth, a ritual unchanged and unimproved upon in centuries. This ensures flawless operation time after time, imparting the feeling of always firing a new gun.

The external profile is sculpted and chiselled by hand, shaping the top mouldings, rounding the edges, before the finest emery

PREMIUM GRADE SHOTGUNS

171

PREMIUM GRADES

cloth is deployed on the firing mechanism; refining, retouching and polishing until the desired release speed is realized. The similarly hand-finished stock wood and action are comformed perfectly, the surfaces cleaned and the mechanical parts assembled to finish the firearm "in bianco" ("in the white"). With the gun complete, it is broken down to guarantee the durability of the actions, fittings and mechanical components through rigorous hardening treatments. Finally, the gun is reassembled for further checks and a firing test.

Stocks & Fore-ends

Only European and American walnut of the finest grain, color and strength are selected for the Beretta Premium Grades. The entire process is determined by client's specific measurements: these are matched first by calibrated milling machines which form the essential sections, and then by the stock-maker, whose time-honored tools create and refine, mount and fix. After it is fitted to the receiver, the stock surfaces are prepared for a final finishing: hand-cut diamond checkering on the grip, butt plate

and fore-end blends aesthetics with anti-slip functionality. The finishing touch is the polishers: an amalgam of wax and oil coatings that best enhance the wood's natural beauty.

The Engraver's Signature

The full skill and creativity of Beretta's master engravers is expressed in a variety of techniques. Be it hammer and chisel, the bulino or gold wire inlay, each is a masterpiece in miniature. From floral motifs to English fine scroll, game scenes to mythical episodes, the most sophisticated styles can be executed on the Premium Grades. Upon completion, the

engraver inscribes his signature, conferring authenticity and confirming the status of these guns as works of art.

BERETTA GALLERY

Every Beretta product, from the custom firearms finished entirely by hand to those produced with the most advanced machinery in modern factories, from the classically inspired sport clothing to hunting accessories and knives, can be found in fine firearms stores and in the Beretta Galleries. In the elegant Gallery

setting our expert staff, all outdoors enthusiasts and fine arms connoisseurs, will assist you in choosing your ideal custom firearm and personalized engraving, and find the perfect Beretta sportswear and hunting accessories to suit your taste, lifestyle and needs.

NEW YORK

718 Madison Ave. 212.319.3235

Established in the heart of New York's Madison Avenue in 1995, the façade of the flagship Beretta Gallery has undergone a complete facelift for the new Millennium. Modeled after the Beretta home in Gardone Val Trompia, and embodying the traditional values of its residents, the stone for the New York Gallery's new hand-chiseled, white and gray façade was extracted from local quarries and delivered from Italy to the United States.

Within the impressive three-story Gallery passionate sportsmen will also find an extensive book selection filled with important works by the best writers and photographers of hunting and outdoors subjects.

41 Highland Park Village 214.559.9800

DALLAS

The Beretta Gallery in Dallas, Texas exemplifies traditional Beretta quality in every detail. The beautiful, well-stocked gunroom features Beretta's full line of firearms, from pistols to shotguns to Premium Grade side-by-side Express rifles. Today the Beretta Galleries continue Beretta's almost 500 year-old tradition of producing custom made shotguns and side-by-side Express rifles for the discriminating gun owner.

Located in the exclusive Highland Park area, the Dallas Beretta Gallery is the destination for those wishing to indulge in the rich heritage of Beretta.

For nearly five centuries, the name Beretta has stood as an undying symbol of resolute quality and professional perfection. Now, the fine Beretta name lends itself to quality watches, designed by Swiss designer Jorg Hysek, appropriate to its calling.

These fine watches are focused specifically on the Beretta Cougar and Tomcat lines and developed pursuant to each of these collections. In typical Beretta style, only the finest, most advanced materials are used in the precision instruments. Cases are angular in shape and are crafted in either matte or polished stainless steel in black, gray or PVD-coated gunmetal gray.

The water-resistant cases emulate the lines of the correlating pistols with accents such as screws, rivets and pushbuttons. Indeed, on the bezel of each Beretta watch there is a foresight much like those found on the pistols, neatly placed at 12:00. The pushbuttons on the Cougar model are reminiscent of the pistol's barrel, and the crown was inspired by the mouth of the barrel.

Currently Beretta watches are found in the United States at the Beretta Galleries in New York and Dallas and outside the United States in the Beretta Galleries in Buenos Aires and Paris.

Galleries worldwide: Paris, Buenos Aires, Milan (opening 2003)
